ANNOTATIONS

Performances measured in labs environment with +/- 10 % tolerance. A misused can lead to temporary or definitive alterations of properties. Contact CEDRAT TECHNOLOGIES prior using actuators under non standard technical conditions

(1) Low frequency < 10 Hz

(2) Peak to peak value, 140 mrad without position sensor, reduced to 70 mrad with position sensor option

(3) Resolution is only limited by the SNR of the amplifier and the measuring equipment resolution. In closed loop with Eddy Current Sensor (ECS)

(4) Gain value measured in quasistatic condition @ 0.05 Hz

(5) Loaded with 31 mm diameter SiC mirror and controlled with MCSA480

(6) @-3 dB and loaded with a 31 mm diameter SiC mirror

(7) Loaded with 31 mm diameter SiC mirror, excluding wires

(8) See mirror ICD

(9) Closed-loop system including ECS45 conditioner and MCSA480 controller (power electronic + control algorithm)
